

Type 1 General Purpose Enclosures **23**

Enclosure (Box) Kit Includes:

- Hinged cover
- · Backpan pre-drilled for listed arrangements (not tapped)
- (2) Ground Lugs and Symbol label
- (2) 22mm knockouts for pilot devices 4
- CÉP7-1ERA Overload Reset Adapter 3
- MR7 Reset Kit for Cover
- (2) 22mm knockouts for Reset 6
- Dual Conduit knockouts Top and Bottom "A" Box - (2) 1/2 to 3/4" and (1) 3/4 to 1"
- "B" Box (2) 1/2 to 3/4", (1) 1 to 1-1/4", (1) 3/4 to 1"
- (4) 8-32 x 1/2" screws for mounting controllers "B" Box also includes (2) 10-32 x 3/4" screws

"B" Box also includes (2) 10-32 x 3/4" screws		"A" Box Kit			"B" Box Kit

- Alternatively CT7N overload relay can be used which will require CT7N-RA3 Reset Adapter. Not included in the kit. Order separately.
- 2" DIN rail can accommodate up to (3) V7-W4 TB's or equivalent DIN rail mount timers, relays, etc. Order kit SF-2 separately.
 3" DIN rail can accommodate up to (6) V7-W4 TB's or equivalent DIN rail mount timers, relays, etc. Order kit SF-3 separately.
- Enclosure designed for use with CPT with top mount secondary fuse, plus back pan mounted Ambus Fuseholder with (2) primary fuses. A CPT and the addition of extra terminal blocks or other control relay using the 2" DIN rail space may require a design change.
- This enclosure is designed for use with a D7 multi-function Start/Stop as standard plus a D7D monolithic pilot light to fit the (2) 22mm knockouts provided. Additional pilot device holes will require field drilling and may interfere with the controller or the addition of a CPT or TB's.
- (2) 22mm knockout locations are provided for one reset Kit to be located contingent on the type of controller used. See box Instruction sheet for mounting details of controller and reset kit.
- For enclosure dimensions see page C122
- CA7-97 and CAT7-97 will not fit in "B" Box because of wire bending space requirements. See Selection tables for box sizes starting on page C122 for dimensions.
- The CEP7-1ERA reset adapter is a 3rd generation accessory only compatible to 3rd generation CEP7-1 overloads

Enclosure Pilot Device Kits & Ratings Definitions

Example of pushbutton kits on an "A" Box

- Pilot Device Kits do not include control wires. See instruction sheet for installation.
- Multi-function START/STOP pushbutton are standard for General Purpose Type 1(M1) dimensions A and B enclosures.

A.C. Coil Codes & Voltage Ranges **O⑤**

All catalog numbers, list prices and enclosure dimensions in the previous section reflect contactors with AC coils. If necessary, add the appropriate price adder to the list price for each coil required as shown in the online catalog. Remember that reversing applications require two coils. Price Adder x 2.

A.C. Coil Codes (Replace "★" in	CA7-9 thru CA7-97 CAN7-1285		
cat.# with coil code)	50 Hz	60 Hz	
24Z	24V	24V	
120	110V	120V	
220W ❷	200-220V	208-240V	
277	240V	277V	
415	400-415V	~	
480	440V	480V	
600	550V	600V	

All Contactor and Starter Configurations

D.C. Coil Codes & Voltage Ranges **06**

For starters with DC coils, select Coil Code from the table below. Remember that reversing applications require two coils (Price Adder x 2). Starter catalog numbers must be modified when using DC coils. For example: For **CAT7-9...55** contactors, add an "E" to catalog number for Electronic DC Coils. i.e.: CAT7-9... becomes CAT7-9<u>E</u>... For **CAT7-60...97** contactors, add a "D" to catalog number. i.e.: CAT7-60... becomes CAT7-60<u>D</u>...

D.C. Coil Codes	6	6	4

CA9-1260-EI	. 20put	24W 🕢	48W	120W	480W
CA9-2050-EI2650-EI		~	~	120W	~

- Only the most common coils are shown here. Other coil voltages may be available. Refer to Contactor Renewal Parts in Section A of this catalog, or contact your nearest Sprecher + Schuh sales office.
- Wide range coil.
- "-EI" designates contactor coil with PLC input. Selections CA9-116...370 with "EI" requires use of control logic on terminals 1, 2, 3. CA9-400 contactors and larger include an integral switch to select use of "EI".
- 4 "DD" coils are standard for CA7-60D...97D.
- 6 Reversing applications require two coils. Add appropriate price adder(s) to list price of enclosed contactors and starters. Remember to add price for each coil required.
- © CA7-9E...55E electronic coils are not interchangeable with non-electronic DC or AC coils.
- This coil range is 24-60V DC only.

Series CAT7 and CAT9 Starters

		CEPT-EEGE S

CB7 Contactor with CEP7 Overload Relay

Large Amp CEP7 Solid State Overload Relays, Automatic or Manual Adjustable Trip Class **0**2**3**

Special Notes:

Wye-Delta Starters - First multiply motor full load current by 58%. Then, using this figure, select appropriate Overload Relay Code from tables above.

Part Wisdownters - First multiply motor full load current by 50%. Tell Share this houre, select appropriate Overload Relay Code from tables Av.

riable Frequency Drives - CEP7 solid state overload relays cannot be

 ³⁻phase CEP7 units are only designed for 3Ø applications. Single phase CEP7S units are only designed for 1Ø applications.

This reference is not intended to be a guide for selecting contactors. Size overload relays using the full load current of the motor.

The reset time of a CEP7 set in the automatic mode is approximately 180 seconds.

GEP7 Overload relays do not work with Variable Frequency Drives or an Sprecher + Schuh Softstarter with braking options.

Utilizes UL approved Current Transformers and a CEP7-EECB overload relay Refer to page B13 for current setting guidance. For CE approved Current Transformers refer to factory.

Ordering Instructions

Change base **Catalog Number** according to instructions at top of column 2. Example: To Add a "Start-Stop" Pushbutton: change **CAT7-30-*-\diamondsuit-GO** to **CAT7-30-*-\diamondsuit-G3**

- Pilot Lights may be applied with 24VAC/DC, 120VAC or 240VAC control circuit. Pilot Lights with 380 VAC...575VAC require a control circuit transformer.
- Modifications may change dimension of starter enclosure.
- Emergency Stop pushbutton includes inscription ring D7-15YSE112. For other selections from page H68 refer to factory.

Special Voltage Transformer - Add suffix F/A to end of catalog # ●				All Ones	
For applications requiring more than 100 Watt extra capacity				All, Open	

Ordering Instructions

Change base **Catalog Number** according to instructions in column 2. Example: To Add a Control Circuit Transformer (480/120) and additional NO/NC auxiliaries: change **CAT7-30-***→**-GO**_ to **CAT7-30-**<u>XC</u>-**→**-**GO**_L11.

Note: Separate multiple modification suffixes with a hyphen (-).

- Factory assigned.
- 2 Coil will be factory selected based on transformer secondary.
- See page C112 for detail specifications for Control Circuit Transformer.
- Refer to factory for pricing on larger oversized control circuit transformer selections.
- **6** Modifications may change dimension of starter enclosure.
- Auxiliary addition is per contactor. Quantity is double for reversing applications. Double price adder accordingly.

CRI7E-★ Electronic Interface Module for use Interface between the DC control signal from a mechanism of the contactor. • Eliminates the need for a power supply-current d range of 12-48V DC • Requires no additional surge suppression for the • Must have output voltage 110240V AC • Add Suffix to end of catalog number: for example CAT7-30-★-◆-GO-JE	a PLC a raw is 1 coils	and the 0 to 15	AC ope	erating oss a vol	ltage	add Suffix to end of Catalog Number -JE	Open All			

Ordering Instructions

Replace * in base Catalog Number with Power Supply code. Example: To Add a Standard Capacity Power Supply with Control Circuit Transformer (480/120):

change **CAT7-30E-<u>*</u>-◆-GO** to **CAT7-30E-<u>PS1XC</u>-◆-GO**.

- Not applicable for Series CA9 Starters. CAT9 Starter applications should strongly consider the use of the "EI" functionality included in the CA9-116...1060-EI Contactors. The optional electronic interface selection allows the CA9 contactor to be switched from a PLC or other low-level signal source (15...33V DC) without the need of an interposing relay. The current burden of the interface is 15 mA maximum.
- Modifications may change dimension of starter enclosure.

Ordering Instructions

Change base catalog number according to instructions at top of column 2 or 3. *Example:* To Add a "Start-Stop" Pushbutton, Control Circuit Transformer (480/120) and RC Link: change CAT7-30-★-◆-G0 to CAT7-30-XC-◆-G3-RC. *Note:* Separate multiple modification suffixes with a hyphen (-).

- Factory assigned.
- For Multi-speed controllers.
- For Duplex Pump controllers.
- For Pump Panel controllers.
- If controller has a Control Circuit Transformer, select transformer with additional capacity for relay required.
- **©** CPT and power supply modification includes fused control circuit protection.
- Modifications may change dimension of starter enclosure.

Panel Shop Certifications

Sprecher + Schuh is an ISO9001 company. Our panel shops are UL and ATEX Certified. Please refer to factory for specifications and label options for the following panel certifications.

UL508A or **SUSE label**: Most starter assemblies can be supplied with a UL508A 'Industrial Control Panel' label. Combination starters can be supplied with Suitable for Service Entrance (SUSE) label. The need for a UL508A or SUSE label must be identified at the time of quotation as well as on the purchase order. The need for a UL508A label may not change the components we would normally use but we must consider all possible requirements at the time we are developing the bill-of-material to be referenced at the time of order entry. Failure to identify the need for a UL508A label or SUSE label at the time of quotation may result in change notice price adders.

ATEX Certification: A requirement for ATEX certification MUST be identified at the time of quotation as well as on the purchase order. ATEX certification of a Type 7/9 explosion proof enclosure definitely requires all conduit and cover openings to be drilled by the enclosure manufacturer. Further, all pilot devices and equipment to be installed must be identified as it controls the heat dissipation which is an ATEX certification requirement. Absolutely no field modification of an ATEX certified starter assembly is allowed. Failure to identify the need for an ATEX certification at the time of quotation and order entry may result in 100% cancelation or re-stocking charge since a new enclosure will be required.

UL1203 Certification: The UL1203 label for explosion proof starters and panels encompasses the UL508A certification. This means all components in a UL1203 labeled panel must first comply with UL508A, and all components in the panel must have a UL label in some form, including the wiring. A special name plate and UL508A label are applied to the panel or starter. A panel is not UL1203 certified unless both label and name plate are present. Contact customquotes@sprecherschuh.com for more information on UL1203 certified panels.

Ordering Instructions

Change base catalog number according to instructions at top of column 2. *Example:* To add an Elapsed Time Meter and Breather Drain to an explosion-proof starter, change CAT7-30-*---E0 to CAT7-30-*---E0. *Note:* Separate multiple modification suffixes with a hyphen (-).

- Factory assigned.
- For Pump Panel controllers.
- **3** Modifications may change dimension of starter enclosure.
