

Series R Modular LED Beacon with Optional Sounder

Auer Signal

The new LED beacon series R is the brightest LED beacon in its category and is especially designed for maximum signaling effect. It is available in two lens designs (high/compact). The compact lens is milky-white in color and its attractive design makes it particularly suitable for indoor use. The high lens is available as a high performance version in addition to the standard performance version.

Features

- Modular LED beacon series with optional sounder
